Mohit Sharma

mohitsharam44@gmail.com| +91 7231008666
Bachelor of Computer Applications (BCA), Data Science
Manipal University Jaipur | CGPA: 9.60

Final-year BCA (Data Science) undergraduate with hands-on industry experience in Data Science, Machine Learning, and Data Analytics through an onsite internship. Proficient in Python with practical expertise in data preprocessing, feature engineering, exploratory data analysis (EDA), predictive modeling, deep learning, and end-to-end machine learning solution development, including model deployment. Adept at transforming complex datasets into actionable insights and developing scalable, data-driven solutions to solve real-world business challenges. Committed to continuous learning and applying AI-driven technologies to deliver meaningful impact.

INTERNSHIP

Data Science Intern | Celebal Technologies| Jaipur (Onsite) **May'26-Aug'26**

Contributed to the development of end-to-end data science and machine learning solutions by performing exploratory data analysis (EDA), data preprocessing, feature engineering, model development, and performance evaluation on real-world datasets. Worked on real-world machine learning and demand forecasting projects, developing predictive classification and time-series forecasting solutions to support data-driven decision-making. Utilized Python, Scikit-learn, LightGBM, and XGBoost for model development, and gained hands-on experience deploying machine learning models using Databricks and MLflow Model Serving.

ACADEMIC PROJECTS

Demand Forecasting AI System using Time Series Forecasting Jun'26-Jul'26

- Designed and deployed an end-to-end demand forecasting solution using time series forecasting models to predict future product demand from historical sales and business factors.
- Implemented advanced data preprocessing, feature engineering, SARIMAX/ARIMAX forecasting, and deployed the model using Databricks Model Serving with REST API integration and a responsive Netlify-hosted web application for real-time predictions.
- **Live Deployed Model: https://demand-forecasting-ai.netlify.app/**

Online Shopper Purchase Intent Prediction using Machine Learning May'26-Jun'26

- Designed and deployed an end-to-end machine learning solution to predict online shopper purchase intent from user browsing behavior and session data.
- Leveraged advanced data preprocessing, feature engineering, hyperparameter optimization, and model deployment using Databricks MLflow Model Serving with REST API integration to enable scalable, real-time predictions.
- **Live Deployed Model: https://purchaseintentpredictor.netlify.app/**

Fake News Detection using Deep Learning Nov'25 –Jan'26

- Developed a deep learning–based text classification model using DNN, CNN, and LSTM architectures to identify fake news articles from real news.
- Implemented data preprocessing and feature engineering (tokenization, TF-IDF vectorization, and scaling) and trained the model using Python, Scikit-learn, and TensorFlow, achieving ~99% test accuracy.

PATENT PUBLICATION

Published Indian Patent titled: "TBNDG: Trust-Based Malicious Node Detection System for Grey-Hole Attacks in Vehicular Ad Hoc Networks (VANETs)"

- Published Indian Patent (Application No. 202611039350 A) proposing a trust-based framework for detecting and mitigating malicious nodes in VANET environments. The system utilizes multiple trust parameters, including packet forwarding consistency, message integrity, and node reputation, to enhance network security and communication reliability while improving packet delivery performance and reducing packet loss.

RESEARCH & PRESENTATION

- Presented and published a review paper at ICRACS 2026 – 3rd International Conference on Recent Advances in Artificial Intelligence, Computer Vision, and Smart Systems, PIET Jaipur, Rajasthan, India (April 17–18, 2026).
- Presented and published a review paper at an international conference, focusing on emerging technologies "DIGITAL TWIN". (December 16 –17,2025)

- Currently working on a research paper on Fake News Detection using Machine Learning and Deep Learning, involving data preprocessing, feature engineering, model training, and evaluation.

TECHNICAL SKILLS

- **Data Science, Machine Learning & Deep Learning**: Python (NumPy, Pandas, Matplotlib,Seaborn), Data Preprocessing, ML-Classification, Regression, Clustering, Deep Learning (DNN, CNN), Structured Data Modeling & Deployment, DataBricks, Jupyter Notebook.
- **Programming & Core CS**: Java (OOPS, Collections), Python, C, C++, Data Structures & Algorithms
- **Software & Tools**: SDLC, Requirement Analysis, HTML, CSS, JavaScript, Git, GitHub, VS Code, Tableau

ACHIEVEMENTS & EXTRACURRICULAR

- Winner — Hackathon Competition, Xavier Institute of Management & Informatics (XIMI), Jaipur, India, 2026.
- Secured 2nd Prize in *Innovative IQ*, an inter-departmental innovation event organized by the Department of Computer Applications, E-Cell, AIC & Bureau of Indian Standards at Manipal University Jaipur (April 2026).
- Recipient of the Dean's Excellence Award for four consecutive semesters in recognition of outstanding academic performance.
- Scored 98/100 in NPTEL's AI-Integrated Management of Next-Gen Software Testing; featured in the Topper's List.
- Achieved 94.68 percentile in the National Think Wonders Competitive Exam (NTCE) 2025, and a Certificate of Merit from Think Wonders.
- Published and presented multiple research papers in the domains of Artificial Intelligence, Digital Twin, and Data Science at international conferences.
- Pre-incubated for a startup idea under Atal Incubation Centre (AIC) at Manipal University Jaipur
- Pre-incubated for 2 different startup idea under E-cell at Manipal University Jaipur.
- Certified in Programming in java (NPTEL).
- Certified in Databricks AWS Redshift Migration and Microsoft SQL Migration, with exposure to cloud data platforms, ETL workflows, data warehousing, migration assessment, and enterprise data modernization practices.
- Certified in Python for Data Science (NPTEL).
- Cisco-certified in Data Analytics Essentials with practical exposure to data analysis techniques.

LEADERSHIP ACTIVITY

Head, Design & Media Team — Centaurus Arena Club, Manipal University Jaipur (1 Year & 5Months).

- Led the Design & Media team, handling content creation, branding, digital outreach, and coordinating tasks and timelines for smooth execution.
- Improved content effectiveness by analyzing engagement and feedback and worked with technical teams to convert complex ideas into clear visual communication.

Event Anchor & Volunteer — Manipal University Jaipur

- Anchored university events and volunteered in organizing multiple campus activities, demonstrating public speaking, teamwork, event coordination, and audience engagement.

Class Representative (CR)

- Served as the Class Representative, facilitating communication between students and faculty while coordinating academic and administrative activities.
